## Your specialist in Disc Couplings

**GSConsult a.s. have for many years supplied the Norwegian Oil & Gas Industry with their high quality couplings.**

**As Exclusive distributor of Bibby Turboflex, TB Wood's and Ameridrives, the industry-leading brands of Altra Couplings that have been providing innovative coupling solutions to meet the requirements for a broad variety of applications spanning many industries. Highly engineered Altra coupling products represent the latest in coupling technology, featuring superior design and exceptional quality to ensure long-lasting performance in all types of environments.**

**Typical Applications is all Engine Driven Equipment**

**Bibby Transmissions Ltd** couplings are specifically designed for the process pump and general industrial markets. Torsiflex is an all-metal disc coupling requiring no lubrication which incorporates a plug-in feature to allow installation and removal without disturbing the pump alignment. Standard units are compliant with API 610 (American Petroleum Institute) and the more demanding API 671 standard can be achieved. In addition, the coupling is certified to meet ATEX 94/9/EC.

**Bibbigard safety element** torque limiters incorporate a number of safety element modules of a specific size mounted between two flanges and preset to release at a specified torque value in order to protect the drive system from expensive damage and lost production. They can be used with various types of drive medium many of which are available from Altra Industrial Motion. Bibbigard has been successfully utilized in many different industries where, subject to space availability, the release torque capacity is virtually unlimited.

**Bibby Gear Couplings** have been proved over many years of use internationally, in all kinds of industrial environments. This reliability has been achieved by our attention to detail in design, applications expertise and stringent quality control.

**TB Wood's** is an industry leading designer and manufacturer of mechanical power transmission equipment for industrial control. Our mechanical product lines include: clutch and brake, synchronous and belted variable speed drives; grid, disk, jaw, gear coupling and elastomeric coupling products; sheaves and bushings. Registered trademarks include Sure-Flex®, Dura-Flex® Form-Flex®, G-Flex® and QT Bushing®.

**Ameridrives couplings** offers a complete line of Coupling Products including Amerigear gear couplings and spindles, Ameriflex diaphragm couplings, Ameridisc high performance disc couplings and universal joints. Ameridrives Couplings is your single source for all your drive applications.
