## Reflecting on the Past for a Clearer Vision of the Future

### REFLECTION

From its inception in 1841, the core focus of National Oilwell Varco (NOV) has always been to provide the energy industry with the highest quality oilfield products and services available. NOV designs, manufactures and sell major mechanical components for land and offshore drilling and well servicing rigs, tubular inspection and internal tubular coatings, extensive lifting and handling equipment, and a broad offering of downhole drilling motors and tools. NOV also provides supply chain services through its network of distribution service centers located near major drilling and production theaters worldwide. With over 700 manufacturing, sales and service centers in over 60 countries, NOV supplies customer-focused solutions that best meet the quality, productivity and environmental requirements of the global energy industry.

### PREPARATION

National Oilwell Varco is continually seeking areas of growth and is constantly developing new technologies and improving quality to meet the ever-changing needs and requirements of our customers. A leader in pioneering innovations to improve the efficiency and safety of oil and gas drilling, NOV also strives to reduce the environmental impact of oil and gas operations. Complementing our full line of products and services, NOV has made strategic acquisitions in the oil equipment and services industry in order to anticipate our customers' needs and offer an even wider array of diversified solutions.

### ORGANIZATION

National Oilwell Varco currently offers a full spectrum of products and services from industry-leading brand names trusted for years. From a spare part to a comprehensive drilling system, we deliver unlimited customer solutions. NOV's integrated solution groups work together to deliver all the technologies, products and services necessary to optimize our customers' specific strategies.

### INNOVATION

National Oilwell Varco will continue to offer diversified oilfield products and services for years to come by evaluating past performance and developing emerging technologies that improve both the quality of our products and the level of our service.
