

**Trade Tech authorized as an Eaton's Crouse-Hinds Division  
Assembly Partner for Explosion-Protected Products in Norway.**

Trade Tech is proud to announce having received the #1 and so far, only certificate of authority as Assembly Partner for Explosion Protected Products outside the Eaton Organization, ATEX and IECEx, from Eaton's Crouse-Hinds Division.

This has been achieved after having completed Eaton's Crouse-Hinds Division's comprehensive Ex-D Stamp Holder training and audit program.

We see this achievement as yet another recognition of our good quality system processes and excellent workmanship, resulting in quality products that have been appreciated by our customers for decades.

With this we expand our capabilities and product offerings that we feel sure will be well received by customers.
