## Technology and knowledge, since 1841

**National Oilwell Varco® is a worldwide leader in the design, manufacture and sale of equipment and components used in oil and gas drilling and production, the provision of oilfield inspection and other services, and supply chain integration services to the upstream oil and gas industry. Our core focus has always been to provide the energy industry with the highest quality oilfield products and services available.**

NOV® is the single source for all of your rig equipment, integrated systems, downhole tools, and supply chain solutions. From spare parts to comprehensive systems, NOV delivers unlimited customer solutions. With more than 60 000 employees and over 1000 worldwide manufacturing, sales and service centers in over 60 countries, NOV supplies customer-focused solutions that best meet the quality, productivity and environmental requirements of the global energy industry.

**Offshore drilling**

NOV provides comprehensive drilling solutions that include technically advanced, field-proven equipment integrated with systems that increase drilling efficiency, enhance Health, Safety, and Environmental (HSE) programs, and maximize customer's life cycle economics. From an array of replacement components to entire drilling systems.

**Floating Production**

NOV's superior floating production solutions include products and services related to permanent mooring and production of oil and gas by floating, production, storage, and offloading unit (FPSOs) and floating, storage, and offloading unit (FSOs). NOV offer solutions, enabling oil companies and operators to produce, load or offload oil and gas in severe weather, avoiding downtime for their facilities with subsequent lost production as well as in benign waters.

**Offshore support**

NOV provides a comprehensive and reliable range of equipment fully integrated into a complete package for anchor handling vessels, offshore support- and various construction vessels, including Well Intervention- and Inspection Maintenance and Repair vessels. NOV delivers an expansive line of cranes, winches, mooring systems, pipe lay and cable lay systems, jacking and skidding equipment and motion compensation systems.

**After Market and training**

NOV provides comprehensive training and aftermarket services to support the lifetime of your NOV equipment through an integrated network of strategically located facilities located worldwide. NOV is continually seeking areas of growth and is constantly developing new technologies and improving quality to meet the ever-changing needs and requirements of our customers. As a leader in pioneering Innovations to improve the efficiency and safety of oil and gas drilling, NOV also strives to reduce the environmental impact of oil and gas operations.
