main Oslo airport Gardermoen

## More than 40 years experience in Supply of Container & Module solutions

Trans Construction AS (ATC) is a leading EPC contractor providing standard and customized container/module solutions, as well as other types of welded constructions, for a wide range of Offshore and Onshore projects. Our services range from supplying containers, outfitted to our customer's specific requirements, to the design and construction of complex modules delivered as turnkey solutions with multidiscipline engineering, fabrication, installation and testing.

Our core business is directed towards the Oil and Gas and Offshore Wind Industry, where we work very closely with our clients in order to make sure the products we deliver meet the project requirements with respect to safety, quality, functionality, documentation and economy.

**Typical projects:**

Standard Containers, outfitted to clients specific requirements for both Onshore and Offshore use, typical examples :-

- Storage-/Workshop-/ Service-/Offset Control Laboratory-/Paint Containers
- Trafo /UPS/Power/VSD containers
- Offices / Rest rooms / Laboratories

Large custom-made containers/modules where sizes exceed standard transport sizes, outfitted to clients requirements, typical examples :-

- Custom made versions of the standard container types above.

Other specialized products, such as:-

- Skids & Enclosures
- Spreader frames / Access platforms
